

Donation of Emergency Support Funds for Damage Caused by the July 2018 Torrential Rain

The AEON 1% Club Foundation has donated a total of JPY30 million, being JPY10 million each for the prefectures of Hiroshima, Okayama, and Ehime, as an emergency fund to support those affected by the record-breaking rain which hit Western Japan.

The recent torrential rains caused a succession of landslides and river floods in various areas, bringing enormous damage. Even now, many people are still obliged to live in evacuation centers.

The Foundation offers its best wishes and sympathy to all those affected by this disaster, and hopes for their lives to return to normal as soon as possible.
